**Value Explanations**

Prices shown are retail consumer values and to be considered as selling prices. Trade-in and loan values are confidential for our dealers and industry base subscribers. Trade-in values are to be determined by local dealers and are generally lower than values shown.

**Low Retail Value** — A low retail unit may have extensive wear and tear. Body parts may have dents and blemishes. The buyer can expect to invest in cosmetic and/or mechanical work. This vehicle should be in safe running order. Low retail vehicles usually are not found on dealer lots. **Low retail should not be considered a trade-in value.**

**Average Retail Value** — An average retail vehicle should be clean and without glaring defects. Tires and glass should be in good condition. The paint should match and have a good finish. The interior should have wear in relation to the age of the vehicle. Carpet and seat upholstery should be clean, and all power options should work. The mileage should be within the acceptable range for the model year.

An Average Retail vehicle on a dealer lot may include a limited warranty or guarantee, and possibly a current safety and/or emission inspection (where applicable).
